

For PAA, L.P. ManageEngine ADAudit Plus are the Best in web based Failed Authentication Auditing and Monitoring Changes in AD!

PLAINS
ALL AMERICAN
PIPELINE, L.P.

This is how we Meet **Security & Compliance Auditing** needs!

- The Simple ADAudit Plus Way!

“ADAudit Plus helped us foremost in monitoring failed authentications and changes in Active Directory. The simple deployment and a cost efficient solution made us choose ADAudit Plus over other auditing software's, the clincher undeniably being the competitive pricing coupled with features that more than met our requirements.”

- *Reginald E Deguzman, Plains All American Pipeline, L.P.*

Customer : Plains All American Pipeline, L.P.

Industry : Oil and Gas

Location : United States of America

Business Needs:

Plains All American Pipeline, L.P. being in the transportation, storage, terminalling and marketing of oil & natural gas, they needed software to track their innumerable worldwide AD logon activities and primarily the failed authentications and to be able to get email notifications once changes were made in the Active Directory.

Solution

ADAudit Plus provides an IT administrator the right business add-ons to assist in the execution of a change management action. ADAudit Plus scores not only on the functionality of gathering assorted Active Directory data, but also in interpreting them as simple reports.

ADAudit Plus has a plethora of reports to help an administrator identify change events that are logged in security logs of Domain Controllers.

A few of the innumerable Active Directory Events that are Audited & Reported:

- User Logon events
- Domain Policy changes
- User objects management
- Group and Computer objects management

The reports are Off-the-Shelf and Out-of-the-box to help easy understanding of event viewer data. The native event log is difficult to comprehend by a naive user considering the data volumes and expertise required to decipher change actions logged in the Domain Controller, which ADAudit Plus change reporting software makes possible with ease.

Meaningful, interpretable and filtered audit information like

- **When** an Active Directory Change was done.
- From **Where** was the change effected.
- **What** were the Changes made and
- **Who** was responsible for the change.

Scheduling Active Directory change reports:

- Make AD change information readily available to the right people without the need of manual extraction.
- Provide options to view Active Directory changes from anywhere in the domain and in a format that is convenient to interpret.
- Automatically notify reports, preferably with abilities to schedule them.

Plains All American Pipeline, L.P. could now track the AD changes for an error free change management administration. ADAudit Plus likewise excels in monitoring the Active Directory data and furthermore pinpointing security breaches.

Benifits:

ManageEngine ADAudit Plus with its complete Active Directory audit reporting features helped Plains All American Pipeline, L.P. to track every failed authentication and AD changes with Scheduled Reports and Instant Alerts to monitor critical accounts. ADAudit Plus is simple to deploy, easy to manage and reasonably priced making it a valuable asset for any company.

About Customer:

Plains All American Pipeline, L.P. is a publicly traded master limited partnership engaged in the transportation, storage, terminalling and marketing of crude oil, refined products and liquefied petroleum gas and other natural gas related petroleum products. Through its general partner interest and majority equity ownership position in PAA Natural Gas Storage, L.P. (NYSE: PNG), PAA is also engaged in the development and operation of natural gas storage facilities. PAA is headquartered in Houston, Texas.

About ADAudit Plus:

ADAudit Plus is an enterprise-wide Active Directory change auditing software with reports and alerts that:

- Address the most-needed audit and compliance demands set forth by regulatory and government bodies.
- Assist an IT administrator in Active Directory change management.

The comprehensive reports and alerts provided by ADAudit Plus are easily comprehensible even to technically naive users. The reports answer the four vital Ws of Active Directory auditing: "Who" did "what" action, "when" and from "where"!

With ADAudit Plus you can:

- View comprehensive reports on administrative changes and logon events in the Active Directory.
- Use filter based rules and configure ADAudit Plus to report / alert about specific change events in AD objects.
- Find answers to the vital 4W's - Who effected what change in Active Directory, when and from where.
- Receive alerts on desired change events - right in your inbox.
- Get the complete history of changes in Active Directory and Group Policy objects.
- Archive change records for better forensic analysis.
- Organize your event log data to help in Security and Compliance Auditing needs.
- Audit the Logon/Logoff activities of the Member Server in a Microsoft Server Environment.
