

A unified enterprise backup and restoration tool

Active Directory | Azure Active Directory | Microsoft 365 | Google Workspace
Exchange on-premises | Zoho WorkDrive

Benefits of ManageEngine RecoveryManager Plus

Flexible backup storage options

Store your backups within your premises in local repositories, or NAS, or in cloud repositories like Azure Blob Storage or Azure Files per your needs while adhering to the 3-2-1 backup principle.

Ransomware threat mitigation

Never pay ransoms for your files. Restore your affected files from your backup instantly.

Unified backup solution

Configure multiple AD domains, Azure AD tenants, Microsoft 365 tenants, Google Workspace tenants, Exchange organizations, and Zoho WorkDrive Teams for backup, and manage them from a single dashboard.

Optimized RPO and RTO

Optimize RPO and RTO with configurable backup frequencies and minimize data loss.

Highlights of RecoveryManager Plus

Domain controller recovery

Back up all domain controllers and restore them to any previous state in the event of a disaster.

Comprehensive backup

Back up all your data from AD, Azure AD, Microsoft 365, Google Workspace, Exchange, and Zoho WorkDrive environments.

Incremental backups

Back up just the changes made to your applications since the last backup cycle and store them as separate versions.

Item-level restoration

Restore individual AD and Azure AD objects, Exchange mailbox items, SharePoint Online and OneDrive for Business files, Google Workspace items, or Zoho WorkDrive data.

AD recycle bin

Restore deleted AD objects and their attributes along with their parent containers in a single click.

Rollback

Roll back your applications to a previous backup point and undo all changes made after that point in time.

Backup retention

Define a retention period for your backups, and discard backups that have exceeded the retention period to meet regulatory compliance standards.

RecoveryManager Plus is an excellent product. It has given us peace of mind that we can quickly recover should something happen to our AD.

Fabio Freire

Director of infrastructure, Sandler O'Neill and Partners

A simple and cost-effective backup solution that solves AD Object restoration with a user-friendly UI.
