

# The Ultimate RMM For Your Managed IT Needs

Revolutionize your MSP business with a cutting-edge remote monitoring and management solution that elevates your productivity.

## Unleash your customer service potential by simplifying your RMM tasks!

Traditional RMMs can be overwhelming, with complex instructions, files, and applications that distract you from assisting your clients. Your ideal RMM should streamline workflows, provide intuitive notifications, and minimize tab switching—all while optimizing device monitoring and management.

## Presenting RMM Central: A powerful offering from a renowned industry leader, perfect for MSPs

You can now manage and monitor multiple client devices with ease. ManageEngine RMM Central ensures clients' IT security and accessibility, quickly alerts you in critical situations, and enhances overall productivity.

RMM Central makes effortless onboarding a possibility, thanks to the lightweight, on-premises agent that can operate on any OS. You can also benefit from extensive documentation and dedicated support that ensures expert guidance during complex operations. RMM Central empowers you to easily tackle even the toughest monitoring and management tasks.

# Key Features

## Instantly gain remote access

Choose to chat, voice or video call customers before gaining remote access for quick resolution without a third-party app or integration.

## Detect, test, deploy (and decline) patches

Detect missing patches, run them through a test environment before choosing to deploy, or decline patches to your customers' Mac, Linux, and Windows devices or third-party applications.

## Effortless onboarding and management

Onboard and manage multiple multi-OS devices easily from a single interface.

## Monitor networks for anomalies

Get notified when your customers' networks run into trouble so you can quickly resolve the issues.

## Complete IT infrastructure management

Manage every layer of your customers' infrastructure from a single interface for comprehensive monitoring and management.

## RMM and Native PSA

Integrate RMM Central with our native PSA tool, ServiceDesk Plus MSP, for a unified RMM and PSA experience.

# Benefits

Distinct client data segregation

Enhanced data insight

Intelligent automations

Intuitive UI

Exponential ROI

We wanted a single platform that could assist us with monitoring, patching, application deployment, and other management and security tasks and RMM Central seemed to have everything under one panel.”
