

AD360 ensures Bank of South Pacific has a clear view of their Windows Server and Netapp Filter Environment

Company: Bank of South Pacific | Industry: Finance | Country: Republic of Fiji

Business Needs

BSP is one of the largest and most successful banking organizations in the South Pacific, with a proud and established reputation in Papua New Guinea and a long history of highly successful business in the region. BSP, Fiji chose AD360's change auditing and monitoring module in order to have a thorough insight on the events in their Windows Server environment. Monitoring their employees' access to customers confidential data and to meet the various compliance requirements.

Solution

With the auditing module, BSP can see-through every event happening in their Windows Server and NetApp Filer environment with event specific 150+ reports and instant email alerts on sensitive files / unauthorized access events. Highlights being AD360's web based, cost effective varied auditing solution (Windows Active Directory, File Servers, Servers, Workstations and NetApp Filer).

Apart from the rich feature set, the web-based intuitive UI, ease of use and the cost-effective pricing model were the other key highlights that made choosing AD360 a no-brainer for BSP.

In addition to the Active Directory auditing module, BSP used the Active Directory management module to take care of all their AD management and reporting needs. This helped BSP to efficiently manage it's employee accounts and generate reports with the help of over 150 complete and comprehensive pre-installed reports for its Active Directory infrastructure.

About AD360

AD360 is an integrated identity and access management (IAM) solution for managing user identities, governing access to resources, enforcing security, and ensuring compliance. From user provisioning, self-service password management, and Active Directory change monitoring, to single sign-on (SSO) for enterprise applications, AD360 helps you perform all your IAM tasks with a simple, easy-to-use interface.

AD360 provides all these functionalities for Windows Active Directory, Exchange Servers, and Office 365. With AD360, you can just choose the modules you need and start addressing IAM challenges across on-premises, cloud, and hybrid environments from within a single console.
