

AD360 helps avoid IT emergency by securing California Transplant Donor's AD environment and stay HIPAA compliant

Company: California Transplant Donor Network | Industry: Healthcare | Country: US

Business Needs

The California Transplant Donor Network (CTDN) is designated by the federal government to serve as the link between organ and tissue donors and individuals awaiting transplantation. Established in 1987, it is the third largest organ procurement organization in the United States. CTDN were in need of AD audit software with possibility for custom reports and alerts.

We are an emergency healthcare provider. We see the software as good risk avoidance with some good risk management practices and help us meet HIPAA compliance. We chose AD360, which works 24/7/365 like us.

JT Mason,

Director of IT, California Transplant Donor Network (CTDN)

Solution

The emergency healthcare provider working 24/7/365 decided on AD360's change auditing and reporting module for its network security and for HIPAA Compliance requirements. They could now monitor and track the Active Directory changes along with customizing reports and alerts to suit their business processes. CTDN credits AD360 as a cost effective product, ease of use and good risk avoidance software with good risk management practices.

In addition to using the auditing module of AD360, The California Transplant Donor Network used the integrated self-service password management and single sign-on module of AD360 to help its domain users perform self-service password reset, self-service account unlock and also provides users with secure, one-click access to Office 365, Salesforce, G Suite and other SAML-supported enterprise applications.

About AD360

AD360 is an integrated identity and access management (IAM) solution for managing user identities, governing access to resources, enforcing security, and ensuring compliance. From user provisioning, self-service password management, and Active Directory change monitoring, to single sign-on (SSO) for enterprise applications, AD360 helps you perform all your IAM tasks with a simple, easy-to-use interface.

AD360 provides all these functionalities for Windows Active Directory, Exchange Servers, and Office 365. With AD360, you can just choose the modules you need and start addressing IAM challenges across on-premises, cloud, and hybrid environments from within a single console.
