EMPLOYMENT AND WORKFORCE

Business Needs

The South Carolina Department of Employment and Workforce oversee the registration and collection of the Unemployment Insurance Tax for South Carolina. The State department needed AD audit software to give its security office more efficiency and control over monitoring domain events.

Solution

The state employment and unemployment benefits organization needed a thorough view of their Active Directory events and administrator activities in particular. Admin activities related reports have given their Security team a much more efficient process to audit and verify complaints against unauthorized modification of records.
