Now there shall be answers to all your Active Directory related queries

AD Query Tool

It is a convenient utility that allows users to query the Microsoft Active Directory from a convenient user interface. Any desired data on specific Active Directory objects can be obtained by supplying LDAP Queries in this tool.

What can I use the Query Tool for?

To search for Domain Users and Domain objects.

To query the Active Directory and view Object schema and LDAP data in one single window.

To view of Email data of users in the domain.

To query the AD for Group and Computer object details.

To selectively view only the columns or AD attributes that you would like for any generic LDAP Query.

Add simple, convenient and absolutely **FREE** to the above benefits!
