

The boss got it right- Accounts that are not password protected are more susceptible to attacks

Empty Password Reporter

The empty password reporting tool helps you track down user accounts with void password fields, thereby helping administrators avoid any security issues.

What can I use the Empty password reporting tool for?

To zero in on user accounts that have empty/null password.

More time saving and convenient compared to command line tools and scripts.

Add simple, convenient and absolutely **FREE** to the above benefits!
