

Keeping track of the many domain controllers in your organization can be a pain indeed!

## DC Monitor

The Active Directory Domain Controller Monitoring Tool - DC Monitor is an easy- to-use tool that auto discovers & displays the Domains. By putting this tool to use, you can obtain the stats on the handling capacity and memory utilization of Domain controllers in your organization.

## What can I use the DC Monitor for?

To monitor domain vital stats like CPU Utilization, Disk Utilization and Memory Utilization.

To get Page reads per second.

To get Page writes per second.

To get File reads and File writes.

To obtain the Handle count (LSASS/NTFRS).

To get the Page faults/sec.

---

Add simple, convenient and absolutely **FREE** to the above benefits!
