# Manage your hybrid Exchange and Skype for Business environments efficiently

What is Exchange Reporter Plus?

ManageEngine Exchange Reporter Plus is a reporting, change auditing, monitoring, and content search tool for Exchange Server, Exchange Online, and Skype for Business. It offers unique reports on various aspects of Exchange such as mailboxes, mail traffic, public folders, Outlook Web Access, and ActiveSync along with usage and configuration details about Skype for Business Server. It's your one-stop solution for managing multiple Exchange servers and tenants simultaneously, all while keeping a close eye on security and compliance.

· Starts at ·
$345
for 100 mailboxes
per year.

Features

Intuitive reporting

Get comprehensive information about all the components of your Exchange environment, including mailboxes, distribution lists, email traffic, OWA usage, and ActiveSync. You also get reports on Skype for Business Server conference details and settings.

Real-time change auditing

Audit your Exchange Server and Exchange Online platforms effortlessly. Track and receive reports on non-owner mailbox access, logon activity, permission changes, server configurations, and more.

Services and endpoint monitoring

Retrieve information about the health and status of components and services in your Exchange environment. Monitor Exchange email queues, database availability groups, databases, server storage, and more.

Instant alerts

Configure email and SMS notifications to be sent to your inbox whenever a critical event happens in your Exchange environment so that you can respond to potential threats immediately.

Granular content search

Perform pattern-, attribute-, and keyword-based searches in your mailbox content. Directly download attachments and keep track of what information is being shared.

> " We needed granular reporting on Exchange to get a better understanding of the environment itself, so that we could begin to change various projects for this core service use. Exchange Reporter Plus gave all this without having to depend on PowerShell scripting. "
