

## ManageEngine AD360

AD360 is an integrated identity and access management (IAM) solution for managing user identities, governing access to resources, enforcing security, and ensuring compliance. With AD360, you can just choose the components you need and start addressing IAM challenges. The supported components include:

ADManager Plus | ADAudit Plus | ADSelfService Plus |  
Exchange Reporter Plus | RecoveryManager Plus |  
O365 Manager Plus

## Bring Them Together for Optimal Efficiency

AD360 is an integrated solution for IAM needs of organizations that use Windows Active Directory, Exchange Servers, and Office 365. AD360 gives you the power to combine up to six other solutions from ManageEngine ADSolutions into a single dashboard, single sign-on, and single configuration IAM tool.

AD360's offering is very good. It's an interesting mix of solutions that caters to various IAM needs arising in our environment. Both ADMP and SSP have gone a long way to simplify and automate our IAM requirements. Product development seems active, and most importantly, ManageEngine support is responsive and helpful across all the products we use.

**Clive Newport**  
Head of IT Infrastructure and Support,  
Vasanta Group

## ManageEngine ADManager Plus

An Active Directory management & reporting solution, which has more than everything you had wished for in ADUC. From a self-explanatory GUI, manage identities (accounts) in AD or extract instant reports – all at the click of a button! This tool can even turn HR personnel into IT administrators.

### FEATURES AND BENEFITS

#### Standardized, One-Stop Provisioning:

From Exchange mailboxes to Office 365 accounts, all user entitlements can be provisioned from a single window or provisioning template.

#### Automated Provisioning/ De-provisioning:

Provisions new user accounts automatically as the roster gets updated. When accounts are terminated, it automatically archives their home folders, revokes their group memberships/access permissions, and Office 365 licenses, and exports mailboxes.

#### Automation of Critical / Everyday AD operations:

Be it "inactive account management" or a routine AD task, it can be automated.

#### Off-the-shelf User Management solutions:

User management is all about changing any of the 150 user attributes based on a situation. Use the prepackaged solution set to re-provision accounts.

#### 150+ Prepackaged, Reprovisioning-Centric Reports:

Say, you're perusing "Users without logon script" report and decide that you'd assign logon script to certain accounts. Right from the report, choose those accounts and assign the script!

#### Smart, noninvasive AD Delegation:

Delegate tasks, not the control! With our delegation system and Active Directory Workflow, you can safely delegate user management tasks to business managers / HR, and get them done just the way you want it.

### CUSTOMER QUOTES

#### Reduces the gap between IT and business

We needed an AD product which the HR can use to manage the users. We found ADManager Plus. With this software...you don't have to be computer scientist. Even my boys, 11 and 12, can do it. This product changed my career!

#### Margaret Sandler

IT Security Specialist, CareTech Solutions

#### Readymade and on-the-fly solutions

I was looking for something that's intuitive, easy to use, and cost-effective. I did a number of searches. I found ADManager Plus and was impressed. We purchased it. I can now certainly see the benefits from reporting perspective and on-the-fly changes that we can do from the reports

#### Ashley Bukket

System Analyst, Macmillan Cancer Support

#### Templates for systematic and policy-centric user management

User management process is really well-thought out. I just have to choose the right template based on the metrics. I don't have to babysit the process anymore. I can hand it off to HR, helpdesk, or even the hiring manager

#### Aaron Bockelie

Senior Systems Administrator, Warner Bros.

### OTHER SALIENT ASPECTS

Automated Office 365 and Google apps provisioning

Exclusive Office 365 & Google apps reporting

GUI-based NTFS permission management

Ability to automate critical tasks and report generation

Nested group reports and management

Integration with help desk tools (ServiceDesk Plus, Zendesk, and ServiceNow), Oracle and MS SQL databases, and Syslog server.

Available on AWS and Azure Marketplace.

Mobile apps : Native Android & iPhone apps to help administrators perform basic AD management and reporting tasks right from their mobile phones

[support@admanagerplus.com](mailto:support@admanagerplus.com)

## ManageEngine ADSelfService Plus

ADSelfService Plus is an integrated Active Directory self-service password management and single sign-on solution. Inarguably the most feature-rich solution in the market right now, ADSelfService Plus supports password management for both on-premises Active Directory and cloud applications.

### FEATURES AND BENEFITS

#### Password Self-Service:

Enables end users to reset their forgotten Windows domain passwords and unlock accounts without help desk's intervention. User can reset passwords from the logon prompt, mobile devices, or web browser.

#### Password Expiration Notification (Freeware):

Notifies users about impending password and account expiration via email, SMS, and push notifications.

#### Granular Password Policy Enforcer:

Improves password security and wards off hackers by enforcing advanced password policy settings such as dictionary rule.

#### Real-Time Password Synchronizer:

Automatically synchronizes Active Directory passwords across multiple platforms including Azure AD, Office 365, G Suite, Salesforce, IBM iSeries, and more.

#### Enterprise Single Sign-On:

Provides secure, one-click access to cloud applications with Active Directory-based single sign-on.

#### Windows Logon TFA:

Enables two-factor authentication for local and remote access to Windows workstations and servers.

### CUSTOMER QUOTES

#### Superfast enrollment for 100% success rate

We have had almost 60% enrollment with ADSelfService immediately, which is a good turn-out when asking students to register for anything. Some have already taken advantage of the tool

**Robert Peterson**  
Technical Support Engineer

#### Easy & quick user adoption. Quick realization of ROI.

Users have commented how easy enrollment is as well as the reset tasks. CAMH will be able to save close to \$26,000 a year on service desk calls related to Active Directory password resets, and will see a return of investment within the first 6 months of implementation

**Margaret Sandler**  
IT Security Specialist, CareTech Solutions

#### Right mix of features for complete annihilation of password reset tickets.

Automatic alerts to users about password expiration date and self-unlocking of accounts reduced involvement of IT support by 40%.

**Michael Kaźmierczyk**  
Senior Specialist, Ministry of Environment

### OTHER SALIENT ASPECTS

Directory self-update and search

Cached credentials update

Multi-factor authentication via Duo Security, RSA SecurID, Biometrics, and more for a secure self-service password reset

Notifications and clear audit trail for self-service operations

Built-in license management for cost savings

Integration with ServiceDesk Plus, ADManager Plus, and AD360

Mobile apps for Android and iOS to help end users reset their passwords on the go

## ManageEngine ADAudit Plus

ADAudit Plus is an IT security and compliance solution. With over 200 event-specific reports and real-time alerts, it provides comprehensive information on changes to both the content and configuration of Active Directory (AD), Azure AD, and Windows servers. Additionally, it provides thorough access intelligence for workstations and file servers (Windows, NetApp, and EMC).

### FEATURES AND BENEFITS

#### Real-Time Change Monitoring and Alerting:

Enable 24/7 surveillance for AD, Azure AD, Windows servers, file servers, and workstations.

#### Trace User Footsteps:

Gain insight into user logon activity occurring across your Windows server environment, spanning from logon failures to logon history.

#### Troubleshoot Account Lockouts:

Detect lockouts instantly with real-time alerts and analyze the root cause for these lockouts with in-depth reports.

#### Protect Sensitive Data:

Track file access across Windows file servers, failover clusters, NetApp, and EMC.

#### Monitor Privileged Users:

Get a complete audit trail for administrator and other privileged user activities. Keep tabs on privileged group membership changes.

#### Actively Respond to Threats:

Leverage threshold-based alerts and machine learning to detect anomalies instantly. Configure the tool to act automatically in the event of an attack.

### CUSTOMER QUOTES

#### Prepackaged Identity and Access Intelligence: Just the Way the Industry Needs

No other software works as effectively or easy as ADAudit Plus. None were as simple to install and jump right in to start using. All audit requirements from HIPAA are covered in ADAudit Plus. We have passed an in-depth PEN audit test and several industry-related security audits because we are using ADAudit Plus. It's extremely simple and cost-effective.

#### Renee Davis

CIO, Life Management Center of NW Florida

#### Real-time IT Security at Nominal Costs

This tool helps me be in command of the technical environment in my Active Directory network. It is easier to find logs and manage more effectively. The low cost for the many features got our attention.

#### Diego Pontes

IT Coordinator, Tecnisa S.A.

#### User-friendly and Complete

I highly recommend ADAudit Plus. Now, I can easily monitor user logons, file deletions / modifications, changes in AD and export them as reports. The friendly UI and product support before and after-purchase are excellent.

#### Huseyin Akbaba

Information Technology Team Leader, RMK Marine

### OTHER SALIENT ASPECTS

User Behavior Analytics

AD FS, AD LDS, and LAPS Auditing

Employee Productivity Tracking

File Integrity Monitoring

Printer and Removable Storage Auditing

Organized Data Archiving

Log Forwarding to SIEM Tools

Advanced Search

“Before and After” Picture for Every Change

Prepackaged IT Compliance Reports for SOX, HIPAA, PCI, FISMA, and GLBA

[support@adauditplus.com](mailto:support@adauditplus.com)

## ManageEngine EventLog Analyzer

EventLog Analyzer is a web-based, real-time log management and IT compliance solution that combats network security attacks. With its comprehensive log management capabilities, EventLog Analyzer helps organizations meet their diverse auditing needs. With out-of-the-box compliance reports and alerts, meeting stringent IT regulatory mandates has never been easier.

### FEATURES AND BENEFITS

#### End-to-end log management:

Collect, analyze, and archive logs from over 600 log sources, including perimeter devices, Windows and Linux/UNIX servers, IBM AS400 machines, databases, web servers, vulnerability scanners, and threat intelligence solutions.

#### Real-time event correlation:

Correlate log data of log sources across the network with predefined or custom correlation rules to detect potential security attacks. View aggregated reports that present log trails on a timeline.

#### Extensive application auditing:

Know who accessed what, when, and from where for every activity happening in business-critical applications such as IIS web servers, Apache web servers, SQL server databases, and Oracle databases.

#### Threat intelligence:

Automatically pull the latest information from STIX/TAXII threat feeds, and send real-time alerts when globally blacklisted IPs and URLs interact with the network.

#### Incident management system:

Send real-time alerts when any anomalous activity occurs, and effectively manage these security incidents by assigning them to technicians in their help desk software.

#### Integrated compliance management:

Utilize out-of-the-box compliance reports for IT regulatory mandates such as PCI DSS, FISMA, HIPAA, GLBA, SOX, and the GDPR.

### CUSTOMER QUOTES

#### Crystal Clear Analytics & Real-time Alerts for Swift Threat Detection

An order of magnitude reduction in the time necessary to reviewing and analyzing logs. Additionally, ELA provides real-time alerting of significant events. This facilitates rapid analysis and reaction to events. Instead of days before identifying a significant event, the event is known in near real time and can be responded to before it becomes an issue

#### Michael Thorp

Principal Information Security Analyst, AAI Corp, Textron, Inc.

#### Best-in-class Intrusion Detection, Economical Pricing

Windows event logs and device Syslogs are a real-time synopsis of what's happening on a computer network. EventLog Analyzer is an economical, functional and easy-to-utilize tool that allows me to know what's going on in the network. It's a premium intrusion detection system.

#### Jim Lloyd

Information Systems Manager, First Mountain Bank

#### A Scalable Tool Trusted for IT Compliance Demonstration

Credit Union of Denver has been using EventLog Analyzer for more than 4 years. Provides great value as a network forensic tool and for regulatory due diligence. This product can be rapidly scaled to meet our dynamic business needs.

#### Benjamin Shumaker

Vice President of IT/ ISO, Credit Union of Denver

### OTHER SALIENT ASPECTS

Support both agent-based and agentless log collection.

Index any human-readable log format with custom log parsing.

Audit changes made to critical files and folders.

Perform log forensic analysis using the comprehensive search engine.

Get actionable insights with intuitive dashboards and canned reports.

[www.eventloganalyzer.com](http://www.eventloganalyzer.com)

[support@eventloganalyzer.com](mailto:support@eventloganalyzer.com)

## ManageEngine Exchange Reporter Plus

Exchange Reporter Plus is a change auditing, monitoring, and reporting solution for Exchange Servers and Exchange Online. Combining charts and self-explanatory UI, this software offers valuable stats and analytics required by Exchange administrators to keep their organization's email infrastructure at its best. It provides an audit trail for crucial events and also monitors all Exchange components.

### FEATURES AND BENEFITS

#### All-Inclusive Exchange Reporting:

Provides complete information about every component of an Exchange infrastructure including mailboxes, OWA, distribution lists, public folders, etc.

#### Mailbox Reports:

Offers a 360-degree view of all the mailboxes in the organization. Reports on every detail including mailbox sizes, permissions, inactive and orphaned mailboxes, and more.

#### Exchange Server Health Monitoring:

Gives a quick overview of the health and status of components in your organization through its reports and straightforward dashboard.

#### Exchange Server Auditing & Alerting:

Reports on critical events such as changes to mailbox permissions or properties. Configure alerts to detect non-owner mailbox logons, someone tampering with permissions, and other alarming events.

#### Email Traffic Reports & Security:

Email traffic through mailboxes, distribution lists, and public folders are analyzed and reported. Offers clear insight into how mailboxes communicate with each other or with external domains.

#### OWA / ActiveSync Reports:

Keep a watchful eye on OWA users, get a detailed summary of ActiveSync-enabled devices and policies governing them, and easily supervise ActiveSync requests.

[support@exchangereporterplus.com](mailto:support@exchangereporterplus.com)

## ManageEngine O365 Manager Plus

O365 Manager Plus is an extensive Office 365 tool used for reporting, managing, monitoring, auditing, and creating alerts for critical activities. With its user-friendly interface, you can easily manage Exchange Online, Azure Active Directory, Skype for Business, OneDrive for Business, Microsoft Teams, and other Office 365 services all from one place.

### FEATURES AND BENEFITS

#### Over 300 extensive reports:

Gain valuable insights into Exchange Online, Azure Active Directory, OneDrive for Business, Skype for Business, and other services with exhaustive, preconfigured reports.

#### Advanced Auditing and Alerting:

Track even the most granular user activities in your Office 365 environment, and get notified instantly about critical activities and changes via email.

#### Real-time Monitoring:

Monitor the health and performance of Office 365 features and endpoints around the clock, and receive instant email notifications upon service outages.

#### Office 365 Management:

Manage mailboxes, users, groups, and contacts effortlessly in bulk. Reset users' passwords and assign or remove licenses easily.

#### Help Desk Delegation:

Create custom roles and delegate them to non-administrative users to reduce the workload of Office 365 admins. Audit admin and technician activities with built-in reports.

#### Security & Compliance:

Ensure compliance and security by continuously monitoring admin and user activities, mailbox security, and password settings.

[www.o365managerplus.com](http://www.o365managerplus.com)

[support@o365managerplus.com](mailto:support@o365managerplus.com)

## ManageEngine RecoveryManager Plus

RecoveryManager Plus is a backup and recovery solution for your Active Directory (AD) environment. Using an intuitive UI, you can forgo complex PowerShell scripts and simplify the process of backing up and restoring your AD. Roll back your entire AD to any backed-up state, recover individual objects, or restore specific object attributes—all in a few clicks.

### FEATURES AND BENEFITS

#### Supports all object types:

Back up all Active Directory objects such as users, groups, GPOs, OUs, computers, and contacts.

#### Incremental backups:

Back up just the changes made to objects after the last backup cycle and store each backup as a separate version.

#### Version management and comparison:

Compare backup snapshots across multiple versions to get an overview of all previous and current values of AD objects before restoration.

#### Attribute-level restoration:

Search for particular changes from different backup versions and restore just the modified attribute you need within a few seconds.

#### Downtime-free recovery:

Restore deleted AD objects or undo changes made to objects without having to stop or restart your domain controllers, and move towards an Always-On Enterprise.

#### AD rollback:

Restore your AD to any previous backup and automatically undo all changes made after that point in time.

#### AD recycle bin:

Restore deleted AD objects and their attributes, including their parent containers, in a single click.

[www.recoverymanagerplus.com](http://www.recoverymanagerplus.com)

[support@recoverymanagerplus.com](mailto:support@recoverymanagerplus.com)

## ManageEngine DataSecurity Plus

### Sensitive data discovery | File server auditing | IT compliance reports

A data security and IT compliance solution for Windows file ecosystems, DataSecurity Plus offers the following capabilities:

- Automatic sensitive data discovery.
- Real-time file server auditing & change notification.
- File access intelligence & analytics.
- Storage analysis for file servers.
- Real-time file integrity monitoring.
- Audit trail & reports for IT compliance.
- Built-in data protection feature against ransomware-like attacks.

### FEATURES AND BENEFITS

#### Automatic Sensitive Data Discovery:

Automatically scans the file servers and flags the presence of any sensitive data outside the intended locations.

#### Exhaustive List of Search Filters:

The tool comes with an exhaustive list of preconfigured search filters that help you spot any kind of sensitive data. When it's not enough (which is rare), you can also write your own search keys.

#### Complete Insight into Every Change:

Every change made to a file or file permission is reported in real time with details including who made the change, when it was made, and from which IP address.

#### File Access Auditing & Analytics:

Besides reporting about successful/ failed access attempts to a file, the tool also analyzes the file access patterns and gives you details that can help in identifying security threats early on.

#### Configurable, Real-time Change Notifications:

Set up the tool to alert about changes that you deem hostile, e.g., unauthorized access attempts or file permission changes.

#### Data Protection against Ransomware-like Threats:

Configure the tool to identify and alert about files being accessed (by user/ process) at an alarming rate. Additionally, a quick follow-up action (such as shutting down the system) can also be set up.

**ManageEngine**  
**SharePoint Manager Plus**

SharePoint Manager Plus is a comprehensive web-based solution that empowers administrators to effectively manage and get reports for on-premises, online, and hybrid SharePoint environments.

**FEATURES AND BENEFITS**

**Easily manage permissions and groups:**

Prevent security breaches by managing the intricate SharePoint permissions assigned to groups and users across SharePoint environments.

**Audit object-level changes:**

Audit any change made to site collections, sites, lists, documents, and files with reports that provide detailed information. Audit log data can be archived as well.

**Track content reception:**

Keep an eye on usage and learn what content is popular as well as what content is not. This insight can be leveraged to generate better content in the future.

**Migrate to Office 365 with ease:**

Move content from on-premises SharePoint to Office 365 at any time, thereby minimizing business disruptions.

**Delegate administration:**

Eliminate the burden of managing the entire SharePoint environment by delegating control to other users.

**Receive real-time alerts:**

Get instant email notifications for critical object-level changes made in SharePoint.
