# Only Secure Laws…no security loss
ADManager Plus automates Scorpion Legal Protect's Security Auditing

> " We would like to use the schedule report to automate some tedious security audit tasks. Furthermore this allows us to bulk disable/enable users. "
>
> — Willem Fouche, IT Manager, Scorpion Legal Protect.

Customer : Scorpion Legal Protect

Industry : Legal Services

Location : Florida, South Africa.

The Case

Posing as a strong legal and financial services network spread across South Africa, Scorpion Legal Protect demanded a solution that will cater to their primary requirement – scheduling security audit reports. With security of data topping their priority list, they were in need of reports that will help identify user accounts that do not conform to internal security policies. An additional requirement was to schedule these reports to run periodically, so the need for manually doing it time and again can be eliminated.

The Negotiator

ManageEngine ADManager Plus came in to the rescue of Scorpion's IT Management – a positive sting that the 'Scorpion' was looking out for. Offering features such as comprehensive reporting, report scheduling, and ease of bulk user management, that Scorpion's IT-eyes could not evade, it proved to be the numero-uno choice for Scorpion.

ADManager Plus was a more-than-adequate fit in the role that Scorpion expected an Active Directory Solution to play. Scheduling of reports, bulk user management, ease of installation and deployment – all these features made AD Manger Plus-Scorpion combination, a perfect example of the classic phrase – the right solution at the right time.

ManageEngine ADManager plus

About Scorpion Legal Protection

Scorpion Legal Protection in an authorized Legal Services Provider and has a record of more than a decade's service in the field of Legal and Financial services. The organization is over 400-strong and has a network of experienced lawyers in all major cities of South Africa and a 24-hour call-center.

About ADManager Plus

ADManager Plus is enterprise-wide Active Directory management software with out-of-the-box reporting user-management features. With an interface that allows ease of access and simplicity of reports, ADManager Plus presents itself as an IT Manager's magic-wand when it comes to Active Directory management. Plus, the reports are oxymoronic – exhaustive in data intensity, yet simple to comprehend.

Feast on the Features...

ADManager Plus is armed to the teeth for any Active Directory management task. With this tool, you can

- Manage AD objects in bulk by using the CSV import feature.
- Generate about 150 different kinds of reports on Active Directory users and objects, and schedule them to run periodically.
- Effectively manage Active Directory groups and OUs.
- Delegate Active Directory tasks and authority for technicians.
- Synchronize with Microsoft Exchange to create mailboxes.
- Think of any other Active Directory Management feature and it's bound to be in ADManager Plus….

A Great Judgment by Scorpion…

With all its features that catered perfectly to the needs of Scorpion Legal Protection, the final verdict was, sure enough, in favor of ADManager Plus. It continues to be a great security asset to Scorpion without allowing any loopholes in the Active Directory Security.
