

Introducing Zia: Your AI assistant for ADManager Plus

Smarter, faster, more intuitive AD management

Get ready to manage Active Directory with the power of AI.

The challenge

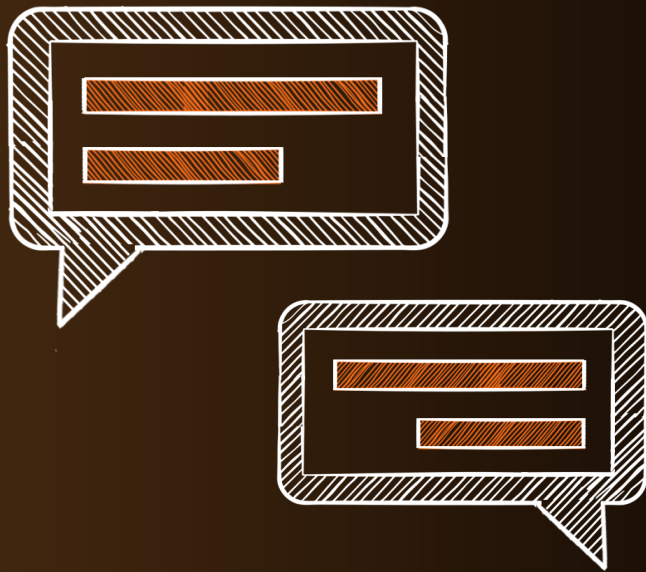

- Finding and generating specific reports can be time-consuming.
- Performing quick, common tasks (like password resets) still requires navigating menus.
- Wasted time means delayed resolutions for end-users.

The solution: Zia

- Instant access: Get reports and perform actions you need immediately, simply by asking.
- NLP: Type your requests in plain English.
- Efficiency boost: Focus on strategic tasks while Zia handles the common chores.
- Zero learning curve: If you can type a question, you can manage AD.

Ask and you shall receive: Instant reporting

How it works: Users type a query into the Zia chatbot.

Examples of queries:

- ❖ Show me a list of all disabled users
- ❖ Generate a report for all users whose passwords never expire
- ❖ Give me a count of all accounts created last month

Key benefit: Eliminates the need to navigate the Reports tab or configure complex filters—reports are generated and displayed instantly.

Beyond reports: Instant management tasks

Zia can perform essential, high-frequency management actions directly from the chat interface.

Supported management tasks:

- ❖ Reset password: Quickly set a new password for any user.
- ❖ Unlock account: Instantly unlock a user's locked account.
- ❖ Enable user: Activate a disabled user account with a simple command.
- ❖ Disable user: Instantly disable a user account for security or separation purposes.

Key benefit: Reduces clicks and streamlines the resolution of common user issues.

Why Zia will change how you work

Speed and simplicity

Use plain English to manage AD, drastically cutting down on time spent navigating menus.

Reduced workload

Easily perform the most common, repetitive help desk tasks.

Instant adoption

Lower the learning curve for new and occasional users. If you can type a question, you can manage AD.

Efficiency

Free up IT administrators' time to focus on strategic projects rather than common tasks and generating reports.

Higher accuracy

NLP ensures you get the exact report or action you intended.

Ready to work smarter?

Stop clicking. Start talking. Embrace a new era of Active Directory management.
