

OnPoint Financial Corporation complies to Payment Card Industry Data Security Standards (PCI-DSS) using ManageEngine® EventLog Analyzer

EventLog Analyzer helps OnPoint Financial Corporation
(Formerly First 1 Financial Corporation) to comply with PCI-DSS regulation effectively

OVERVIEW

Industry

Finance

Critical Requirements

- Detect suspicious activities in the Network that could lead to breach of data
- Meet Payment Card Industry - Data Security Standard (PCI-DSS) requirements
- Continuous monitoring of the activity logs

Solution

ManageEngine EventLog Analyzer

Results

- Mitigated risk of security breaches with real-time alerts on suspicious activities
- Activity logs are monitored 24x7
- Stays compliant with ISO 27001 certification
- Stays compliant with Payment Card Industry - Data Security Standard (PCI-DSS) requirements

Indepth log analysis is essential in the financial services industry to meet compliance requirements and maintain enterprise-wide security. Financial services companies are entrusted with customers' financial data and so a continuous monitoring of the activity logs helps readily detect suspicious activities that could lead to breach of data.

Company Credentials

First 1 Financial Corporation is a leader in subprime automobile financing. Based in Norwell, MA, the company is led and staffed by professionals with many years of experience in the business.

Log Management Challenges

Mr. Yioulos, CIO of First 1 Financial Corporation was looking for a log management tool primarily to meet his Payment Card Industry - Data Security Standard (PCI-DSS) requirements. He also wanted to keep a watch on his systems to ward off potential internal and external threats.

The Narrowing Down

Mr. Yioulos evaluated a number of Open source and commercial products before narrowing down the choice to ManageEngine's EventLog Analyzer. He also added that the user interface was very intuitive and provided easy-to-find views of analyzed logs on each of his monitored devices. To conclude, Mr. Yioulos said, "I would give an A+ to the capability of the product on the log collection, archiving and reporting front. I would recommend it to any administrator, in search of a log analysis product."

“Its easy to set up, no hunting around, very cleverly organized, pretty complete, and gives a quick sense of what is happening. An excellent tool to help meet our compliance needs!”

Dimitri Yioulos,
Chief Information Officer, First 1 Financial Corporation

Working with the Product

“ Without a doubt, the compliance reports feature has been of great value to us here at First 1. We, of course, are subject to a number of laws and regulations, including PCI. The canned compliance reports in the EventLog Analyzer product remove the guesswork of having to decide what events to monitor to stay compliant. It couldn't be easier. And, for those laws or regulations for which there are no pre-built reports, creating your own is just as easy. Finally, the reports that are generated satisfy any compliance audit. We simply didn't see this level of ease of use and features, combined with polish, in other products ”

Dimitri Yioulos,
Chief Information Officer, First 1 Financial Corporation

About EventLog Analyzer
