About Combilift

Combilift is the largest global manufacturer of multi-directional forklifts and the acknowledged leader in long-load handling solutions. Combilift employs more than 600 people at its new, purpose-built Global Headquarters and 46,500 m² manufacturing facility, which was officially opened by An Taoiseach in 2018. More than 50,000 units have been sold in over 85 countries since Combilift was established in 1998. Responsiveness to the ever-changing needs of the customer permeates every area of the business.
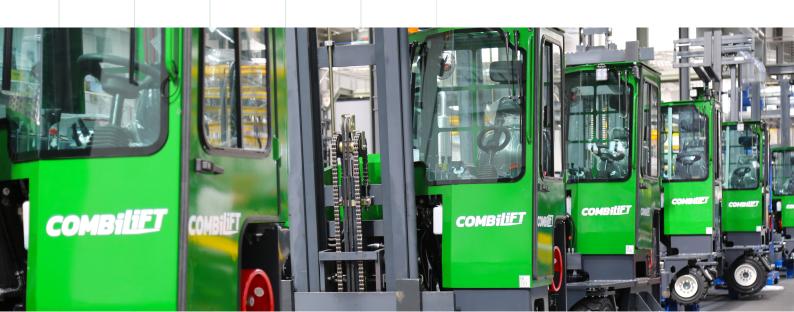

Commenting on the decision to select

Fearghal Mc McCorriston,
IT Manager Combilift stated;

> "When we began to roll-out mobile tablet devices to our production staff, we soon realised we needed a system to manage our devices. We began evaluating MDM products based on our requirements.
> We wanted a system that was easy to set up and deploy, one which was cloud-based, and which was competitive price-wise."

Customer Testimonial

"ManageEngine offered everything we needed when it came to its features and also with regards to compatibility with our hardware and setting up and deploying the devices was a breeze for our technicians. If we ever required assistance or help with configuration, the support team was always readily on-hand to assist."

"ManageEngine's MDM solution is used on all our factory mobile devices and we plan to roll-out the software to all devices we use worldwide. Mobile Device Manager Plus is the first ManageEngine product we've used, and it has proved to be an excellent choice — we are now also using the ManageEngine Patch Management system"

Fearghal McCorriston - *IT Manager*
