Course Objectives

ADAudit Plus training helps your IT administrators to effectively audit your Active Directory and the entire Windows infrastructure. This training helps exploit ADAudit Plus to its fullest potential. At the end of the training you will be thoroughly equipped to use the software and achieve

- Complete visibility on administrative changes in your Active Directory
- Use filter based alerts to report on any critical events.
- Find answers to the vital 4W's – who effected what change, when and from where on your Windows infrastructure.
- Get the complete history of changes on AD and Group Policy Objects.
- Organize your audit data to help in Security and Compliance auditing needs.

Who should attend

If you are an IT Manager, IT Administrator or IT Auditor you can leverage the features of ADAudit Plus by undergoing this training. This training completely helps you to transform your auditing activities thereby helping in all compliance needs.

Introduction

- Overview of ADAudit Plus
- How does ADAudit Plus work?
- Key Features
- Benefits
