7 rock solid reasons

to choose
SharePoint Manager Plus

A single console for SharePoint on-premises and Online

SharePoint Manager Plus helps administrators manage both SharePoint servers and online SharePoint environments from a single console.

Easy management of permissions and groups

Prevent security breaches and unauthorized access to sensitive content by managing the intricacies of SharePoint permissions, groups, and users across the SharePoint environment.

Change auditing for individual infrastructure elements

Audit any change made to site collections, sites, lists, documents, and files and receive exhaustive information on them with SharePoint Manager Plus' intuitive reports.

Track content reception

Keep an eye on usage trends to learn which content is and isn't favored. Leaverage this insight to generate content that has better chances of being received by users.

Migrate to SharePoint Online in a jiffy

Content from SharePoint On-Premises can be granularly selected and moved to SharePoint Online at any time, thereby eliminating the risk of business disruption and downtime.

Reports with unparalleled granularity

SharePoint Manager Plus' built-in reports let nothing go unnoticed and make compliance easy by simplifying auditing and reporting tasks. These reports can be scheduled to run automatically and sent in various formats via email.

Delegation of administration

Administrators can delegate control to other users to relieve themselves of the burden of managing their entire SharePoint environment.
