ManageEngine AD360 Training

About AD360

AD360 is an integrated identity and access management (IAM) solution for managing user identities, governing access to resources, enforcing security, and ensuring compliance.

Course Agenda

Installing AD360

- System requirements

- Installing AD360 as an application and as a Windows Service

- Starting and accessing AD360 web console

Integrating the components

- Integrating products installed in other machines with AD360

- Traversing the different components through the apps pane

- Synchronizing the data between the integrated components

Dashboard

- Customizing the dashboard and embedding it in external sites

- Adding new widgets to the dashboard

Reporting

- Viewing reports on Active Directory, Exchange Server, and Office 365 from one place

- Exporting reports in various formats

Logon settings

- Configuring single sign-on, smart card, and two-factor authentication for secure login

- Allowing/restricting access to AD360 based on IP address

Centralized administration settings for AD360 and integrated components

- Setting up high availability

- Configuring automatic database backup and build update

- Configuring mail server, SMS, and proxy settings

- Applying SSL certificate and enabling HTTPS

- Settings up AD360 as a reverse proxy server for enhanced security

General settings

- Enabling license expiration and product downtime notifications

- Enabling single sign-out, single shutdown, and single console settings

- Migrating from the built-in database to other databases

- Personalizing language and time zone settings

- Customizing logo, title, etc.
