

AD360 holds hands with Blessing Hospital to achieve Windows Active Directory environment monitoring and auditing needs

Company: Blessing Hospital | Industry: Healthcare | Country: US

Business Needs

Blessing Hospital is the largest and most sophisticated regional medical center in a 100-mile radius located in the heart of west central Illinois, offering a breadth of services including a Heart & Vascular Center and Cancer Center. Blessing Hospital needed to analyze user account lockouts.

Solution

Blessing Hospital in Central Illinois benefited from the Active Directory change monitoring and reporting module of AD360.

The account lockout analyzer report analyzes various components like Windows services, service accounts, COM objects, network drive mappings, scheduled tasks, logon sessions and points the exact reason for the user account lockout. Blessing Hospital credits AD360 with finding a complete solution to their AD monitoring and auditing needs and happy with the product features for the cost effective pricing.

Apart from using the auditing module of AD360, Blessing Hospital also used the AD management module. With the management console, IT administrators and technicians were able to manage AD objects easily and generate instant reports at the click of a button.

About AD360

AD360 is an integrated identity and access management (IAM) solution for managing user identities, governing access to resources, enforcing security, and ensuring compliance. From user provisioning, self-service password management, and Active Directory change monitoring, to single sign-on (SSO) for enterprise applications, AD360 helps you perform all your IAM tasks with a simple, easy-to-use interface.

AD360 provides all these functionalities for Windows Active Directory, Exchange Servers, and Office 365. With AD360, you can just choose the modules you need and start addressing IAM challenges across on-premises, cloud, and hybrid environments from within a single console.
