RecoveryManager Plus

System and Port Requirements

www.recoverymanagerplus.com

System requirements

The following table lists the recommended hardware requirements for ManageEngine RecoveryManager Plus.

Hardware requirements

Hardware		Minimum requirement
Processor		2.13GHz or higher
RAM		8GB (minimum) 16GB (recommended)
Disk space	Active Directory/Entra ID	This requirement varies based on the number of AD objects, Entra ID objects, the size of your domain controller, and the retention period that you set for your backups. RecoveryManager Plus has a best case compression ratio of 2:1 for domain controller backups.
	Microsoft 365	This requirement varies based on the number of backed-up Exchange Online mailboxes, the size of your SharePoint Online and OneDrive for Business sites, and the retention period that you set for your backups. RecoveryManager Plus typically compresses backups to a third of their original size. If the total size of the mailboxes, SharePoint Online, and OneDrive for Business sites is 1TB, make sure that you have 1TB of free disk space to store the full backup and all subsequent incremental backups.
	Google Workspace/ Zoho WorkDrive	This requirement varies based on the number of backed-up mailboxes the size of your Google Workspace user drives, and Zoho WorkDrive folders. RecoveryManager Plus typically compresses backups to a third of their original size. If the total size of the mailboxes, user drives, and folders is 1TB, make sure that you have 1TB of free disk space to store the full backup and all subsequent incremental backups.
	On-premises Exchange	This requirement varies based on the number of backed-up Exchange mailboxes and the retention period that you set for your backups. RecoveryManager Plus typically compresses backups to a third of their original size. If the total size of the mailboxes is 1TB, make sure that you have 1TB of free disk space to store the full backup and all subsequent incremental backups.

Operating system requirements

RecoveryManager Plus can be installed and run on the following operating systems (both 32 bit and 64 bit architecture) and versions:

- Windows Server 2022
- Windows Server 2019
- Windows Server 2016
- Windows Server 2012 R2
- Windows Server 2012
- Windows Server 2008 R2
- Windows Server 2008
- Windows 11
- Windows 10
- Windows 8.1
- Windows 8
- Windows 7

Supported web browsers

RecoveryManager Plus has been tested to support the following browsers and versions:

- Mozilla Firefox
- Google Chrome
- Microsoft Edge
- Internet Explorer 10 and later

Recommended screen resolution

- 1366 x 768 pixels or higher

Supported databases

ManageEngine RecoveryManager Plus supports the following databases:

- PostgreSQL (default database bundled with the product)
- MS SQL

Product ports

The following table lists the default ports used by RecoveryManager Plus. They can be modified during or after installation.

Protocol and Port	Usage	Type of traffic
TCP and UDP 389	Directory, replication, user and computer authentication, Group Policy, trusts	LDAP
TCP and UDP 636	To connect RecoveryManager Plus securely to your Active Directory,	LDAPS
TCP and UDP 88	User and computer authentication, forest-level trust	Kerberos
TCP and UDP 445	Replication, users and computer authentication, Group Policy, trusts	NTLM
TCP and UDP 464	Replication, user and computer authentication, trusts	Kerberos change/set password
UDP 137,138 and TCP 139	User and computer authentication	Netlogon, NetBios
TCP 33310	If you are running Recovery Manager Plus with Postgres DB	Postgres database
TCP/IP 1433 and 1434 UDP	If you are running Recovery Manager Plus with MSSQL DB	MSSQL database
TCP 135 and dynamic ports	Timezone offset of domain controller	WMI
TCP 5985 and TCP 5986	Group Policy	PowerShell remoting
HTTP port range: 9290	Communication between the local Elasticsearch node and RecoveryManager Plus	Elasticsearch database
TCP port range: 9390	Communication between multiple Elasticsearch nodes	Elasticsearch database

In addition to the above ports, there are a few ports that you will have to enable based on your Azure environment.

Azure Worldwide
