## ManageEngine
Log360

Harden your

ACTIVE DIRECTORY ENVIRONMENT

with Log360's

SECURITY AND RISK
POSTURE MANAGEMENT

3 key benefits of AD security and risk management with Log360

Comply with Microsoft security baselines

Harden your Active Directory's risk posture with Microsoft's security baselines and also get insights on vulnerabilities and recommendations to fix them.

Spot risky configurations at ease

Assess your AD environment regularly to spot security risks and get granular visibility into weak and risky configurations.

Easy and efficient compliance with the GRC system

Spot vulnerabilities in their initial stages, customize risk rules based on internal requirements, and comply with all mandates.

About Log360

Log360 is a unified SIEM solution with integrated DLP and CASB capabilities that detects, prioritizes, investigates and responds to security threats. Vigil IQ, the solution's TDIR module, combines threat intelligence, ML-based anomaly detection and rule-based attack detection techniques to detect sophisticated attacks, and it offers an incident management console for effectively remediating detected threats. Log360 provides holistic security visibility across on-premises, cloud and hybrid networks with its intuitive and advanced security analytics and monitoring capabilities.
