

OpManager

A powerful, user-friendly network monitoring software with

- Real-time network monitoring
- Physical & virtual server monitoring
- Storage monitoring
- Fault management
- WAN & VoIP monitoring

Key features

- Tightly integrated network monitoring solution
- Powerful user web client
- Detailed performance monitoring for multi-vendor devices
- Flexible, centralized reporting

Benefits

- Lowers operating expense
- Reduces MTTR and downtime
- Enhances usability with powerful UI
- Improves visibility and control with unified mgmt.

Supports 9500+ multi-vendor network devices | Scales upto 10k devices or 50k interfaces

OpManager editions	Standard edition	Professional edition	Enterprise edition
Maximum devices	1000	1000	10,000
Maximum interfaces	10k	10k	50k
Architecture	Non-distributed networks	Non-distributed networks	Probe-central networks
Starts @	\$245 for 10 devices	\$345 for 10 devices	\$11,545 for 250 devices

Testimonial

"In my opinion, OpManager is the most beneficial tool we own. There is a greater ROI with OpManager than with the other more costly monitoring systems like Tivoli, OpenView or SCCM's Operations Manager. Not to mention the ease of installation and configuration as compared to OpenView or Tivoli."

-David Henry
AOSmith Electrical Products Company.

Comprehensive list of features

Real-time network monitoring

- Network health monitoring
- Live dashboards & graphs with up to 1 minute granularity
- Interface availability & bandwidth monitoring

Fault Management

- IT workflow automation
- Alerts via email, SMS and mobile apps
- Easy drill down network maps

WAN & VoIP Monitoring

- Monitor WAN RTT, latency and paths
- Monitor & troubleshoot VoIP quality issues
- Historical trend reports

Physical & Virtual Server monitoring

- Monitors over 300 server performance metrics
- Supports VMware, Hyper-V, Citrix Xen servers & Nutanix HCI
- Capacity planning & resource allocation

Storage Monitoring

- Multi-vendor storage management in a single console
- Monitor RAIDs, tape libraries & FC switches
- Forecasts on storage capacity and traffic utilization trends

Advanced Reporting

- 100+ out-of-the-box reports
- Top N reports for network devices
- Business snapshot based reports

Key Differentiators

- Customizable dashboards with 100+ widgets across all modules
- Integrated snapshot page with all performance, bandwidth & configuration details
- Customizable business view with SNMP & NetFlow data
- Unified alarms page for real-time fault management
- One report builder for easy report generation
- Common setting for faster deployment
- Single software for reduced management footprint
- Consolidated inventory to manage all devices at one location

System Specifications

for 10K interfaces or 1000 Devices

CPU	:	Intel Xeon Quad Core, 2.5 GHz	OS Windows	:	Windows Server 2012 R2/ 2012/2008 R2/ 2008 Windows 10/8/7.
RAM Size	:	16 GB	OS Linux	:	Ubuntu, Red Hat, Suse, Fedora and Mandriva (Mandrake Linux)
Hard Drive	:	40 GB free disk space is recommended	Database	:	MSSQL 2008, 2012, 2014 and 2016 or OpManager bundled PostgreSQL
