CASE STUDY

Before ADAudit Plus, my Manager would ask what this that and why did this... but now all is good. The product features are straightforward and easy to manage.

Mohammed Raziuddin - Systems Administrator, Northern Land Council, Australia

Australia

Business Needs

The Northern Land Council was established in 1973 to represent traditional Aboriginal landowners and Aboriginal people in the Top End of the Northern Territory of Australia. The most important responsibilities of the NLC are to consult with traditional landowners and other Aborigines with an interest in the land. NLC IT team needed to closely monitor their Windows Server environment.

Solution

NLC team was able to monitor their Windows Active Directory and Servers with ADAudit Plus. Their primary need was to find a solution to the IT security questions raised by superiors; the 150+ preconfigured reports came as absolute relief to the team. The NLC were not only able to secure their Windows Server environment but also managed to meet regulations, export reports to departments and save on their IT team question and answer time with solid reports of user logins, duration, successful file / folder access and modifications and much more.
