# ManageEngine ADManager Plus

An Active Directory management & reporting solution, which has more than everything you had wished for in ADUC.

From a self-explanatory GUI, manage identities (accounts) in AD or extract instant reports – all at the click of a button! This tool can even turn HR personnel into IT administrators.

## FEATURES AND BENEFITS

### Standardized, One-Stop Provisioning:

From Exchange mailboxes to Lync, all user entitlements can be provisioned from a single window or provisioning template.

### Automated Provisioning/ De-provisioning:

Provisions new user accounts automatically as the roster gets updated. When accounts are terminated, it automatically archives their home folders and revokes their group memberships / access permissions.

### Automation of Critical / Everyday AD operations:

Be it "inactive account management" or a routine AD task, it can be automated.

### Off-the-shelf User Management solutions:

User management is all about changing any of the 150 user attributes based on a situation. Use the prepackaged solution set to re-provision accounts.

### 140+ Prepackaged, Reprovisioning-Centric Reports:

Say, you're perusing "Users without logon script" report and decide that you'd assign logon script to certain accounts. Right from the report, choose those accounts and assign the script!

### Smart, noninvasive AD Delegation:

Delegate tasks, not the control! With our delegation system and Active Directory Workflow, you can safely delegate user management tasks to business managers / HR, and get them done just the way you want it.

## CUSTOMER QUOTES

### Reduces the gap between IT and business

We needed an AD product which the HR can use to manage the users. We found ADManager Plus. With this software...you don't have to be computer scientist. Even my boys, 11 and 12, can do it. This product changed my career!

#### **Margaret Sandler**

IT Security Specialist, CareTech Solutions

### Readymade and on-the-fly solutions

I was looking for something that's intuitive, easy to use, and cost-effective. I did a number of searches. I found ADManager Plus and was impressed. We purchased it. I can now certainly see the benefits from reporting perspective and on-the-fly changes that we can do from the reports

#### **Ashley Bukket**

System Analyst, Macmillan Cancer Support

### Templates for systematic and policy-centric user management

User management process is really well-thought out. I just have to choose the right template based on the metrics. I don't have to babysit the process anymore. I can hand it off to HR, helpdesk, or even the hiring manager

#### **Aaron Bockelie**

Senior Systems Administrator, Warner Bros.

## OTHER SALIENT ASPECTS

Automated Office 365 and Google apps provisioning

Exclusive Office 365 reporting

GUI-based NTFS permission management

Ability to automate critical tasks and report generation

Nested group reports and management

Mobile apps : Native Android & iPhone apps to help administrators perform basic AD management tasks right from their mobile phones

# ManageEngine ADSelfService Plus

ADSelfService Plus is an IT self-service solution designed for Windows environment. Inarguably the industry's most feature-rich IT self-service solution, ADSelfService Plus can be implemented independently or integrated seamlessly with your websites.

## FEATURES AND BENEFITS

### Password Self-Service:

Enables end-users to reset their forgotten Windows & Mac passwords (or unlock accounts) without IT helpdesk's intervention. Users can reset passwords from logon prompt (GINA) or via web browser.

### Password Synchronizer:

Synchronizes the users' passwords for various cloud/SaaS apps with Windows Active Directory passwords.

### Password Expiry Notifier (Freeware):

Emails password expiry notifications to end-users, prompting them to change their passwords before it's too late.

### Self-Service Directory Updater:

Helps end-users update their profile info, which keeps the corporate white pages up-to-date and accurate.

### People Search:

A search tool for users to search and locate their peers' contact information. (As a bonus, IT administrators can search for a user's AD attributes such as "ObjectGUID", etc.)

### Self-Service Group Subscriber:

Enables users to subscribe to their favorite mail groups, provided those groups are distribution lists in AD and administrator has permitted self-service.

## CUSTOMER QUOTES

### Superfast enrollment for 100% success rate

We have had almost 60% enrollment with ADSelfService immediately, which is a good turn-out when asking students to register for anything. Some have already taken advantage of the tool

**Robert Peterson**

Technical Support Engineer

### Easy & quick user adoption. Quick realization of ROI.

Users have commented how easy enrollment is as well as the reset tasks. CAMH will be able to save close to \$26,000 a year on service desk calls related to Active Directory password resets, and will see a return of investment within the first 6 months of implementation

**Margaret Sandler**

IT Security Specialist, CareTech Solutions

### Right mix of features for complete annihilation of password reset tickets.

Automatic alerts to users about password expiration date and self-unlocking of accounts reduced involvement of IT support by 40%.

**Michael Kaźmierczyk**

Senior Specialist, Ministry of Environment

## OTHER SALIENT ASPECTS

Universal password reset for cloud apps

Alerts upon self-service operations

Mobile-based OTP verification

Clear audit trail for self-service actions

Built-in license management

Password Policy Enforcer

Integrates with ADManager Plus workflow for assisted IT self-service

Integrates with ServiceDesk Plus

Mobile apps : Native Android & iPhone apps to help end-users reset their passwords right from their mobile phones

# ManageEngine ADAudit Plus

ADAudit Plus is an IT security and compliance solution designed for Windows-based organizations. It provides in-depth knowledge about changes effected to both the content and configuration of Active Directory and servers. Additionally, it provides thorough access intelligence for desktops and file servers (including NetApp filers), enabling you to protect organization data.

## FEATURES AND BENEFITS

### Real-time Change Monitoring & Alerting for Active Directory:

A 24x7 surveillance camera for AD! Any change, whether in AD or some member server, is instantly notified with all the 4 Ws recorded: "who" did "what"; from "where" and "when".

### User Logon Monitoring:

Get a detailed report of the users' logon and logoff activities, whether they happen via workstations or terminal services.

### Audit trail for admin & other privileged user activities:

Track what administrators do. Get details about activities carried out by privileged accounts.

### File Access & User Activity Auditing:

(covers Windows file server & NetApp Filers) Know what files/folders the users are accessing. Track every activity they carry out on a file including reading, or deletion, or copying/moving of files.

### Anomaly Detection:

Get alerted about unusual events that do not conform to the usual/expected pattern of occurrences, say non-business logon hours or dubiously high invalid logon attempts, before they could magnify into catastrophes.

### Contextual Analysis of Events:

Profile-based event trackers, filters, and event fetching rules enable you to view every change and event from a broader perspective, making incident detection easy.

## CUSTOMER QUOTES

### Identity & Access Intelligence: Prepackaged just the way the industry needs it

No other software works as effectively or easy as ADAudit Plus. None were as simple as but none were as simple to install and jump right in to start using. All audit requirements from HIPAA are covered in ADAudit Plus. We have passed an in-depth PEN audit test and several industry-related security audits because we are using ADAudit Plus. It's extremely simple and cost-effective.

#### Renee Davis

CIO, Life Management Center, Florida.

### Real-time IT Security at Nominal Costs

This tool helps me be in command of the technical environment in my Active Directory network. It is easier to find logs and manage more effectively. The low cost for the many features got our attention.

#### Diego Pontes

Technisa SA

### User-friendly and Complete

I highly recommend ADAudit Plus. Now, I can easily monitor user logons, file deletions / modifications, changes in AD and export them as reports. The friendly UI and product support before and after-purchase are excellent.

#### Huseyin Akbaba

Information Technologies, Rmk Marine

## OTHER SALIENT ASPECTS

Report & Alert Profiles: Configure your own event trackers and alerts

Printer Auditing

File Integrity Monitoring

Dedicated Privileged Account Monitoring

Organized Data Archiving

Removable Storage Auditing (Win 8 & above)

"Before and After" Picture for Every Change (for Windows 2008 & above)

Prepackaged IT compliance reports for SOX, HIPAA, PCI, FISMA, and GLBA

# ManageEngine Exchange Reporter Plus

Exchange Reporter Plus is an analysis and reporting solution for MS Exchange servers. Combining charts and self-explanatory UI, this software offers valuable stats and analytics required by Exchange administrators to keep their organization's email infrastructure at its best. Additionally, it provides an audit trail for crucial events such as mailbox permission or property changes.

## FEATURES AND BENEFITS

### All-Inclusive Exchange Reporting:

Both the "must know" and "good to know" information is available for every component of an Exchange infrastructure including mailboxes, OWA, distribution lists, public folder (and its contents), etc.

### Mailbox Reports:

Offer a 360-degree view of all the mailboxes in the organization. From mailbox size to permissions, every detail is reported. Additionally, you get to spot inactive or orphaned mailboxes, enabling you to get rid of them and secure the infrastructure.

### Email Traffic Reports & Security:

Email traffic through the mailboxes, distribution lists and public folders are analyzed and reported. Finer attention has been paid to mailbox traffic, so that you get a complete picture of how mailboxes communicate with each other or with external Internet domains.

### OWA / ActiveSync Reports:

You can keep a watchful eye on OWA users through these reports. Get a detailed summary of ActiveSync-enabled devices and ActiveSync policies governing them. Supervise the ActiveSync requests.

### Exchange Server Auditing & Alerting:

Critical events such as changes to mailbox permissions or properties get reported. Alerts can be configured to detect alarming events such as a store dismount, or dubiously high non-owner mailbox logon, or someone tampering with "Send As" permissions.

## CUSTOMER QUOTES

### Self-Explanatory Reports To Help Exchange Management

We needed granular reporting on Exchange so we can have a better understanding of the environment itself, and so that we can begin to charge various projects for this core service use. Exchange Reporter Plus gave all this – without having to depend on powershell scripting.

#### Shannon Rubin

IBTS (Institute for Building Technology and Safety)

### Easy Mailbox Size Planning

It was difficult to find out Exchange mailbox sizes and carry out capacity planning. Exchange Reporter Plus reports helped us, and we were able to decrease mailbox sizes and not add to disk. And this tool was well within our budget.

#### Renee Davis

CIO, Life Management Center, Florida

### Reports, Stats, & Analytics in a User-Friendly UI

As a system administrator for an enterprise, I can say that Exchange Reporter Plus is a great and easy tool to track your Exchange environment, using a friendly web-based analysis UI. With this tool, it's easy to get mail traffic stats, mailbox sizes and properties. Very useful.

#### Tzachi Elkabatz

## OTHER SALIENT ASPECTS

Mailbox & Public Folder content tracking

Mailbox retention policy reporting

Detailed storage reports for mailbox/  
public/server stores

Custom recipients traffic monitoring

Exclusive inactive distribution list reports

Elaborate mailbox property reports

Customizable views for better insight

## PRODUCT PRICING AND LICENSING INFORMATION

Product	Product is licensed...	Price
	Per domain	<b>Starts at \$495</b> (for 1 domain and 2 helpdesk technicians)
	Per user	<b>Starts at \$595</b> (for 500 users)
	Per domain controller	<b>Starts at \$495</b> (for 2 domain controllers)
	Per mailbox	<b>Starts at \$295</b> (for 100 mailboxes)
	Per object	<b>Starts at \$395</b> (for 250 AD objects)
	As per the license specifications of individual AD components.	FREE for those who're already using multiple ManageEngine AD products  <b>Lowest Configuration Starts at \$790</b> (Components: ADManager Plus + Exchange Reporter Plus)

# ManageEngine RecoveryManager Plus

RecoveryManager Plus is an Active Directory backup and recovery solution which streamlines AD change management. It's engineered to take away all the pain and effort involved in one of the most dreaded IT tasks: Active Directory backup and recovery. With its neat UI and design, the tool enables you to effortlessly restore AD objects to a preferred state or specific point in time.

## FEATURES AND BENEFITS

### Self-Explanatory UI and Simple Recovery Process:

From a friendly UI accessible via a web browser, recover deleted Active Directory objects or undo inadvertent changes to objects without much ado.

### Automated, Schedulable Active Directory Backups:

The tool automatically backs up Active Directory objects as per the backup schedule configured by you.

### Uptime-Friendly Active Directory Recovery:

There is no need to stop or restart Active Directory while recovering deleted objects or undoing object changes.

### Versions for Easy Point-in-Time Restoration:

Changes to objects happening at a point in time are grouped and earmarked, making it easier for you to roll back an object to a desired state.

### Comparative Review of Changes:

Alongside the current value of an object attribute, the tool lists down a neat record of all the values the attribute had previously held. This enables you to comparatively analyze the changes and decide what is best to restore.

### Complete or Granular Recovery:

You can either restore a whole Active Directory object or selectively restore a few of its attributes.

# ManageEngine AD360

AD360 is designed for environments, where it takes at least two of the following to solve IAM challenges.

Choose what suits your needs and combine them.

## Bring Them Together For Optimal Efficiency

AD360 is a unified solution for identity and access management (IAM) needs of organizations running on Windows-based infrastructure. AD360 gives you the power to combine any or all of the four ManageEngine ADSolutions into single-dashboard, single sign on, and single configuration IAM tool.

AD360's offering is very good. It's an interesting mix of solutions that caters to various IAM needs arising in our environment. Both ADMP and SSP have gone a long way to simplify and automate our IAM requirements. Product development seems active, and most importantly, ManageEngine support is responsive and helpful across all the products we use.
